Remote Panel Operation

TASKalfa devices (models ##01/##51, ##02/##52 & ##03/##53 and 406ci Series), along with select Desktop A4 devices, support the ability to control the entire operation panel experience remotely.

+ Device must be utilizing the latest firmware.

+ Open the Command Center of the device by inputting its IP Address into a web browser (i.e. http://192.168.1.5).

+ Log in as "Admin".

+ In the left-hand navigation bar scroll to Network Settings and select Protocol.

+ Find the option for VNC (RFB), the default setting is Off, change to On, scroll down and press Submit.

  *VNC (RFB) :   ○ On   ● Off

  *Available Network :   ☑ Wired Network   ☑ Wi-Fi
                                  ☑ Wi-Fi Direct

+ In the left-hand navigation bar scroll to Management Settings and select Remote Operation.

+ Turn the function On and select "Off" for User Restriction then press Submit.

  *Remote Operation :   ● On   ○ Off

  *Use Restriction :   [Off   ▼]

  VNC Compatible Software :   Available

+ You will now need to download and install the free VNC Viewer app at https://www.realvnc.com/en/connect/download/viewer/.

+ Once the software is installed open the application. In the address bar type your device IP address followed by a colon and 9062 (i.e. 192.168.1.5:9062) then press Enter to connect to the device.
